PROJECTS

FLOOD MANAGEMENT SERVICES

Flood Management Services is a web app where general public can file complaints about the flood and soil erosion by taking relevant photos and geotagging them and submit them to the government.

I worked on the Front end development of the project and created a mobile friendly Single Page Application (SPA) using AngularJS, Bootstrap

HACKATHONS

SMART INDIA HACKATHON 2018

My team and I participated in the SIH 2018 and successfully submitted a developer preview of the application FLOOD MANAGEMENT SERVICES to the panel.

Gained a good knowledge and good skills to develop a production ready application! Thanks for SIH.

ACHIEVEMENTS

- Ranked international 47th in International Math Olympiad in 8th grade
- Ranked in top 500 in International Math Olympiad in 9th grade
- Participation Certificate from SIH 2018
